• About Me

Motivated Cybersecurity and IT undergraduate with hands-on experience in penetration testing, vulnerability assessment, threat detection, and incident response. Proficient in Linux systems and CLI, SIEM log monitoring, EDR solutions, network traffic analysis, and malware analysis. Experienced with tools including Nmap, Wireshark, Burp Suite, Metasploit, Splunk, and ELK Stack, alongside C and Python for security scripting. Seeking an internship to contribute to real-world security operations and grow within a professional cybersecurity team.

• Education

Edith Cowan College, Diploma of Science (Computing/IT)	November, 2025.
CICRA Campus, Foundation In Cyber Security	October 09, 2025.
ICBT Campus, Diploma In Information Technology	September, 2024.
Zahira College Matala, G.C.E. (O/L) Examination	May 29, 2023.

• Hand-On Practice

Hack The Box | CTF Labs & Academy - Active Member, 2024 - Present

- Compromised Linux and Windows machines across Easy, Medium, Hard, and Insane difficulty tiers by exploiting CVEs, misconfigured services, and advanced techniques including privilege escalation and reverse shells, with documented risk findings and remediation write-ups.

TryHackMe | Hands-On Training - Active Participant, 2024 - Present

- Completed guided and unguided rooms covering enumeration, web exploitation, privilege escalation, and network vulnerabilities through realistic adversarial attack chains.

PortSwigger | Web Security Academy - Web Application Security Labs, 2024 - Present

- Exploited OWASP Top 10 vulnerabilities including XSS, SQLi, CSRF, and IDOR using manual and automated techniques with Burp Suite.

LetsDefend | Blue Team Training - Active Participant, 2025 - Present

- Investigated real-world SOC alerts covering malware analysis, phishing detection, SIEM log analysis, and incident response through hands-on blue team simulations.

• Technologies

- Languages: Python, Bash (Shell Scripting), SQL, C, C++ ,php
- Networking & Infrastructure: Network Monitoring & Troubleshooting, Network Traffic Analysis, Network Penetration Testing, Vulnerability Discovery & Reporting.
- Remote Access & Support Tools: RDC, VNC, SSH, Hosting Panels (cPanel/Plesk)
- Tools: Nmap, Wireshark, Splunk, ELK Stack, Trellix, CrowdStrike EDR, Cortex XDR, Burp Suite, Metasploit, ffuf, Gobuster, Subfinder, Ghidra, IDA, x64dbg, steg, Ligolo
- IT Support & Services: End-User Technical Support, Hardware & Software Troubleshooting, System Configuration & Deployment, Peripheral Installation & Configuration, IT Asset Management & Inventory Tracking, Technical Documentation, Help Desk Support, Application Rollout Support, System Upgrades & Migrations

- Interests: Capture the Flag Competitions, Self-learning via TryHackMe, PortSwigger, and HackTheBox practice labs
- Other Skills: Web Penetration Testing, API Penetration Testing, Malware Analysis

• CTF Competitions & Events

CryptX 2.0 - University of Sri Jayewardenepura

Achieved Top 15 in Round 1, Advanced to Final Round - Top 10

CyberQuest - IIT Sri Lanka | 2nd Place in Round 1, Advanced to Final Round - Top 10

Sleigh The Flag - NSBM Green University | Top 5 Finish

Cyber Summit CTF - CICRA Campus | Top 5 Finish

• Projects

Scan-Things - Automated Reconnaissance Tool - github.com/IkramCaffoor/Scan-Things

- Automated reconnaissance using Nmap (service/version scanning) and ffuf (directory brute-forcing) with SecLists wordlists.
- Streamlines enumeration for CTF and penetration testing with structured, timestamped outputs.

Log Parser

- Built a Bash CLI application that formats Apache Server log files and enables filtering of logs based on keywords.
- Utilities Used: sed, awk, grep
- Identified and documented log-based security events to support threat detection, risk monitoring, and incident escalation workflows

• Certifications

C|CSEH (Certificate in Cyber Security & Ethical Hacking) (CICRA CAMPUS) - Completed

• Courses

Linux 100: Fundamentals - TCM Security

Trainee - Python Programmer - University Of Moratuwa (UOM)

Offensive Security Operations - CYBARY
