About Me

Motivated Cybersecurity and IT undergraduate with hands-on Practice in penetration testing, vulnerability assessment, security monitoring, and log analysis. Familiar with both Red Team and Blue Team security practices, including network and web application testing, threat detection, SIEM monitoring, and basic incident investigation. Experienced with Linux systems and CLI, network traffic analysis, and security tools including Nmap, Wireshark, Burp Suite, Metasploit, Splunk, and ELK Stack. Comfortable with Python and Bash for security-related scripting and automation. Seeking an internship to apply my practical cybersecurity skills, contribute to security operations, and continue developing across both offensive and defensive security.

Education

Edith Cowan College - Diploma of Science (Computing/IT) November, 2025.

CICRA Campus - Foundation In Cyber Security October 09, 2025.

ICBT Campus - Dilploma In Information Technology September, 2024.

Zahira College Matale - G.C.E. (O/L) Examination May 29, 2023.

Hand-On Practice

Hack The Box | CTF Labs & Academy - Active Member, 2024 - Present

- Compromised Linux and Windows machines across Easy, Medium, Hard, and Insane difficulty tiers by exploiting CVEs, misconfigured services, and advanced techniques including privilege escalation and reverse shells, with documented risk findings and remediation write-ups.

TryHackMe | Hands-On Training - Active Participant, 2024 - Present

- Completed guided and unguided rooms covering enumeration, web exploitation, privilege escalation, and network vulnerabilities through realistic adversarial attack chains.

PortSwigger | Web Security Academy - Web Application Security Labs, 2024 - Present

- Exploited OWASP Top 10 vulnerabilities including XSS, SQLi, CSRF, and IDOR using manual and automated techniques with Burp Suite.

LetsDefend | Blue Team Training -Active Participant, 2025 -Present

- Investigated real-world SOC alerts covering malware analysis, phishing detection, SIEM log analysis, and incident response through hands-on blue team simulations.

Technologies

- Cyber Security: Reconnaissance, Enumeration, Exploitation, Privilege Escalation, Penetration Testing, Vulnerability Assessment, Web Application Security, API Security, Network Security, Testing & Reporting
- Tools: Burp Suite, Nmap, Wireshark, Splunk, ELK Stack, Metasploit Framework, ffuf, Gobuster, Subfinder, Ghidra, stego, John the Ripper, Hashcat, Active Directory tools,
- Remote Access & Support Tools: RDC, VNC, SSH, VPS
- Languages: Python, Bash (Shell Scripting), SQL, C, C++ ,php
- Cloud & Systems: Linux, Linux CLI, AWS (Linux-based CTF/Lab Environments), SSH, VPS, Windows

- Security Operations: SIEM, Security Monitoring, Log Analysis, Threat Detection, DFIR, Network Traffic Analysis, Splunk, ELK Stack, CrowdStrike EDR, Log Analysis
- Other Skills: Technical Documentation & Reporting, Security Testing, Cross-Team Collaboration

CTF Competitions & Events - root@ECU

CryptX 2.0 - University of Sri Jayewardenepura | Top 15 in Round 1, Final Round - Top 10

CyberQuest - IIT Sri Lanka | 2nd Place in Round 1, Advanced to Final Round - Top 10

Sleigh The Flag -NSBM Green University | Top 5 Finish

Cyber Summit CTF - CICRA Campus | Top 5 Finish

Cyber Security Mini Hackathon 2026 - ECU - Sri Lanka | Winners (1st Place)

Cyber Shield 5.0 - SLIIT | Top 10 In 1st Round | Final Round - Runner Up (2nd Place)

VECRTA - IIT Sri Lanka | Top 15 in 1st Round | Top 10 in Final Round (Attack & Defense - KOTH)

Cypher 4.0 - KDU | Top 5 in 1st Round | Top 5 in Final Round (4th Place)

Projects

Scan-Things - Automated Reconnaissance Tool - github.com/IkramCaffoor/Scan-Things

- Automated reconnaissance using Nmap (service/version scanning) and ffuf (directory brute-forcing) with SecLists wordlists.
- Streamlines enumeration for CTF and penetration testing with structured, timestamped outputs.

Log Parser

- Built a Bash CLI application that formats Apache Server log files and enables filtering of logs based on keywords.
- Utilities Used: sed, awk, grep
- Identified and documented log-based security events to support threat detection, risk monitoring, and incident escalation workflows

Certifications

C|CSEH (Certificate in Cyber Security & Ethical Hacking) (CICRA CAMPUS) - Completed

Courses

Linux 100: Fundamentals - TCM Security

Trainee - Python Programmer - University Of Moratuwa (UOM)

Offensive Security Operations - CYBARY

HacktheBox Academy Pathway

Tryhackme Academy Pathway
